International Conference to Discuss World Resources

Plans have just been completed for the holding of a new kind of international conference. It is the first conference of scientists to be convened by the United Nations. More than that, the United Nations Scientific Conference on the Conservation and Utilization of Resources to begin in April, will be the first occasion on which experts in the many techniques of utilization of resources will come together from every continent to view the world as it is and as it should be.

Sixty men, forest men, power men, mineral experts are used to meeting in separate groups to discuss their own special problems. At this conference, however, and after months of groups of experts and administrators will pool their specialized knowledge in a concerted development of the world's resources.

The warnings that the world's resources are running out will be seriously discussed. It is known that there is a dangerous waste of resources in every country and an important part of the business at

RED CROSS DONATIONS

The local branch of the Canadian Red Cross has received additional contributions from residents of the district and listed below are the latest donations:

Jas. Baker \$5; H.S. Dewar \$5; G. A. Berdahl \$5; Stark Kornick \$2; George Bacon \$2; J.J. Berdahl \$1.

James Bacon \$5; F.H. Petersen \$2; Gerald Baker \$2; R.J. Petersen \$10; E.R. Petersen \$10; Peter Andrew \$5.

After a long, dry spring rain fell in the Carbon district Monday afternoon, the resulting moisture was a much needed help for crop and garden.

James Bacon \$5; F.H. Petersen \$2; Gerald Baker \$2; R.J. Petersen \$10; E.R. Petersen \$10; Peter Andrew \$5.

After a long, dry spring rain fell in the Carbon district Monday afternoon, the resulting moisture was a much needed help for crop and garden.

TUESDAY, MAY 24, A DOMINION HOLIDAY

Tuesday, May 24, is a Public holiday and all places of business will be closed.

As this is the day of the correspondent, Mrs. Frank Emery, mails advertising copy and news, we request all advertisers to have their copy into Mrs. Emery by Monday noon, so that it will be received in time for publication on Wednesday.

LONG YEARS AGO

Thursday, May 16, 1929

L. Gutman of the Carbon Trading Company has purchased the business of the White Cafe that was partially destroyed by fire some time ago and is having it fitted into a larger store.

A heavy snowfall was experienced in the district Monday night and Tuesday morning, providing a good start for crops this spring.

George Zeigler's house was burned to the ground at his farm southeast of Carbon on Sunday afternoon.

Ward was received Saturday that Mr. Albert J. Wright had successfully passed his final year in Medicine at the University of Alberta. Mr. Wright is the son of Mr. and Mrs. S.N. Wright of Carbon.

GIRLS' SOFTBALL TEAM

The Carbon girls' softball team visited Acme Monday, May 9, for a return game against the Acme nine and hung up their second victory in a row by swamping the home team 15-5.

Community Shower Honors Couple

Friday evening, May 13, about 150 people gathered at the Scout Hall to honor Miss Ruth King and Mr. Donald Gordon, whose marriage will take place on Wednesday, May 18. The evening was opened with the grand march and dancing was enjoyed. Mr. Leo Foxon led the community singing. Shirley Hay and George Ohlhauser sang "Sunbonnet Ruby and Overall Don." Mrs. Ben F. Peacock sang "The Girl in the World." Shirley Hay and Joanne Ohlhauser, dressed as bride and groom, presented the young couple with many beautiful gifts inside a prettily decorated wagon. Miss Violet Pattison, on behalf of the United Church choir and Young People, presented the couple with a gold ring.

Rev. C.A. Warren gave a short talk and wished the happy pair every success and happiness in the future. Ruth and Don expressed sincere thanks to the gathering for the lovely gifts.

A delicious lunch was served by the hostesses, Mrs. J.E. Adams, Mrs. A.J. McLeod, Mrs. S.F. Torrance and Mrs. Len Hay.

H.I.SCHOOL HIGHLIGHTS

Protective Wilson has been on the loose again this time on the trail of an ink thief. The crime was committed at 11:30 and at 11:35 Det. Wilson was on the job. By 11:45 the culprit was caught and sentenced to 100 hours of labor—washing the ink off the wall.

A High School Baseball League has been formed between Acme Carbon and Swayze and will commence play in the spring.

The first game of the season was played on Friday, May 13, when Carbon travelled to Swayze and emerged victors by a 16-2 score in a game of the Acme sports on the 24th of May.

UNIQUE DISCOVERY

Nest With Two Eggs Of Whooping Cranes Found In Texas

CORPUS CHRISTI, Tex. — Two eggs and the nest of two cranes which sometimes have been found at the Arkansas National Wildlife Refuge.

C. A. (Bud) Keefe, refuge manager, said it was the nest ever made by whooping cranes in captivity, and the nest disappeared in the United States since 1890.

He said only 33 whooping cranes are known to be living.

"If the eggs are hatched successfully the Arkansas refuge

may be the habitat for a revival of this great bird which is now nesting extinction," he said.

The two cranes on the refuge near here were wounded in the wings by hunters' guns and cannot fly. Three others not yet captured were captured this year on the lower end of the refuge.

Keefe did not accompany the 28 other cranes who came late in April to fly to their normal nesting grounds somewhere in a Canadian Prairie province.

Whooping cranes were once quite common in the eastern and midwestern states, but were hunted to extinction. There are North America's tallest bird—standing 47 feet high with a wingspan of 7 feet.

The Arkansas National Wild-life Refuge on the Texas coast is almost a virgin wilderness of swamps, open prairies and growths of blackjack. It has been the annual winter grounds of the surviving remnants of the whooping cranes once great flock.

Three cranes have been made in recent years to track the cranes to their nesting grounds in Canada, but each attempt has failed.

Three whooping cranes have been caught in the Antarctic ocean. That's one year's biggest catch story.

A British nobleman has gone to work as a fishmonger. That's one way of trying to scale the ladder of success.

A wild steer survived 50 shots when it invaded a Canadian town. A tough streak in the making.

The first pyramid date, Zadok Durst, has come out, appearing in Egypt over 4,000 years ago. It was the rod of authority. The Pharaoh had it made to show he was the son of the sun.

She summoned Police Chief Lee Sheppard and Patrolman Harry Rex who dragged him off the way as he was about to do his duty.

It was such a close shave, Sheppard thought the train had run over him.

These new school "blackboards" might be as protective coloring for the class dances.

The life of a two-cent dollar bill, we read, is about one year. Even so, its biography would make most interesting reading.

STAMP CORNER :

By JAMES MONTAGNES

—Stamp courtesy Imperial Stamp Sons, Toronto, Ont.

Bernuda has issued a commemorative stamp to mark a century since its first stamp (top left). Egypt has issued a postage stamp for its agricultural and industrial exhibition (centre). France has released a stamp for "Day of the Postage Stamp," featuring Choisel, postmaster general of the French post office, and a portrait of King George VI. The original of these stamps appeared on one penny black in 1851. The original is round stamp with the date in the centre, and the words Hamilton, Bermuda, 1851. Both stamps are catalogued at \$2.50.

In 1865 Bermuda again issued regular British colonial designs for the first time. Queen Victoria. This design, with modifications, was used till 1880, when a picture of a native boy was issued in place of the portrait of the Queen. A sailing ship appeared on designs from 1910 to 1919. King George V. In 1920 a new design on high value stamps of 1917. In 1920 a set appeared to mark 300 years of representative government. In 1921 and 1922 another set appeared for 300 years of local representative institutions. For the silver jubilee of King George V. In 1933 the standard British colonial stamps appeared.

The first pictorial stamps were issued in 1938. They were views of the islands and sailing boats. Some of the stamps had insets of King George V. In 1938 the British colonial design was issued for the coronation of King George and Queen Elizabeth, and in 1938 a set pictorial with King George VI. This is the set in the picture. It is still currently in use.

In 1946 the first colonial designs were printed for Bermuda.

Now issues... Costa Rica issues a set to its national agricultural fair and another set to the re-education of 1948... South Africa is

Seasonable Costume Combines Black And White

The seasonable ensemble at left combines black and white print with a black wool jacket, left. The dress has elbow-length sleeves and buttons down the front to low-placed placket. The jacket is faced down each side.

Stylist: Miss Dorothy Smith, Director of the Nutrition Division of the Health League of Canada.

Liquid portion of the vegetable oil generally contain approximately one-third of the water soluble vitamins such as vitamin C and vitamin E, according to Miss Smith.

"Similarly, about one-third of the minerals are found in the liquid."

The Health League of Canada explained that modern canning methods resulted in conservation of the extracted vitamins and minerals for the liquid portion of the vegetable oil.

Miss Smith suggested if the liquid portion of the vegetable oil is heated with the solid portion that it is used in soups and gravies.

"Whatever you do, don't discard the valuable liquid," Miss Smith said.

"For instance, in the case of canned green beans, 36 per cent. of the water soluble vitamins are lost in the liquid, 33 per cent. of the thiamine, and 24 per cent. of the riboflavin content."

The liquid in canned vegetables contains 40 per cent. of the ascorbic acid.

"Since ascorbic acid, or vitamin C, goes to many strong and valuable body tissues, certain people don't want to knowingly discard any of it. Thiamine, or Vitamin B1, is essential for muscle contraction, thiamine for growth in general, while riboflavin, vitamin B2, has much to do with proper chemical changes of foods in body cells."

HEALTH

Much Food Value In Liquid Part Of Canned Goods

Housewives and cooks who discard the liquid part of their canned vegetables are committing a grave error, according to Miss Dorothy Smith, Director of the Nutrition Division of the Health League of Canada.

Liquid portion of the vegetable oil generally contain approximately one-third of the water soluble vitamins such as vitamin C and vitamin E, according to Miss Smith.

"Similarly, about one-third of the minerals are found in the liquid."

The Health League of Canada explained that modern canning methods resulted in conservation of the extracted vitamins and minerals for the liquid portion of the vegetable oil.

Miss Smith suggested if the liquid portion of the vegetable oil is heated with the solid portion that it is used in soups and gravies.

"Whatever you do, don't discard the valuable liquid," Miss Smith said.

Japanese Had Plans For Expensive Trip

WINDSOR, Ont.—An astoundingly astute Japanese, who planned to give a Windsor taxicab company \$1,000 worth of business by taking a cab to San Francisco, had his trip cut short by a U.S. immigration official.

The man, who gave no name or address, had no passport or other credentials.

A cab official said the Oriental never batted an eyelash when told how much the 10-day trip would cost.

The official said that when the man was stopped the first time, he appealed to the United States Consulate in Windsor but was again unsuccessful.

Consular officials said wartime restrictions governing Japan still existed and that the man was not allowed to enter the country.

The result was this quite drastic experience—normally apple trees are not sprayed during the period of open bloom—proves beyond doubt, officials say, that under present wartime conditions, DDT is not harmful to honeybees.

DISCUSSED CAR OWNER TOOK EASY OUT

CINCINNATI.—Charles McGees, 24, discussed with a used car dealer his desire to buy a 1946 Ford.

The dealer said that when he was let it slide down a steep incline into the Ohio river.

"The man was the fastest piece of pulp I have gone since I bought it," he told police.

The 1947 model car was abandoned on a steep hillside in the city of John's River, a savage expert pulled it out.

He intends to keep it.

CHEAP INSURANCE

Rat proofing to cheap insurance. In three different U.S. cities, the units of building rats averaged \$5.75 to \$6.40 an hour.

On the other hand, keeping the rats, costs \$20 a rat per year.

STEEL PRODUCTION

A record was set in the production of 434,000 tons of open hearth steel in 20 years ago.

The record was set in 1923 when the tonnage was issued in less than six months of 1948.

On The Side E. V. Duriling

Say, young fellow, have you a letter from a feminine friend handy?

If the loops in her handwriting are long, it reveals she is affectionate. If the loops are short, the girl is a cold side. It also writes if she has a heavy, treasured love, or a pen she is interested in.

She is not a preferred companion for a date, but she is a good friend. She is confident and optimistic and will make a happy wife. If her handwriting slants downward, that's bad. She will spend most of her time shopping, and will be a very disappointing matrimonial mate. That's what the psychopathologists claim. A psychopathologist is a double threat—a psychiatrist and a handwriting expert.

THEY SAY

Scorpio (Oct. 23-Nov. 22) women have highly magnetic eyes which they cleverly use in a somewhat hypnotic fashion to influence the male of the species. Liberty-loving bachelors should be on guard when in the company of Scorpio women, for she is a natural born seducer, especially on the occasion of a wedding.

She is not a preferred companion for a date, but she is a good friend. She is confident and optimistic and will make a happy wife. If her handwriting slants downward, that's bad. She will spend most of her time shopping, and will be a very disappointing matrimonial mate. That's what the psychopathologists claim. A psychopathologist is a double threat—a psychiatrist and a handwriting expert.

OVER THERE

The British are undeniably the greatest gamblers. They will bet on anything. The British bookies are always ready to accommodate them. These English even have a regular price line on blessed events. Even the weather is to be bet on. The British are the most superstitious people in the world. They are twins. Three hundred to one as to triplets, and so on. Recently a British government official said it was practically impossible for a blindfolded man to identify his wife.

To the British, the Oxfordian shorthaired pointer is the best dog. The British are the most superstitious people in the world. They are twins. Three hundred to one as to triplets, and so on. Recently a British government official said it was practically impossible for a blindfolded man to identify his wife.

The British bookies made the Oxfordian a short-priced favorite. Their price was \$100 to one. The British are the most superstitious people in the world. They are twins. Three hundred to one as to triplets, and so on. Recently a British government official said it was practically impossible for a blindfolded man to identify his wife.

The British bookies made the Oxfordian a short-priced favorite. Their price was \$100 to one. The British are the most superstitious people in the world. They are twins. CONGREGATION BUILDS THEIR OWN CHURCH—Rev. Michael Brandon, a Latvian minister at Timmins, has had his church building problem solved. After years of battling the cold northern winter, the minister, with help from many in his congregation and the community, recently, his dream come true—a chapel. The church spire was drawn from a tall wooden spire of the small mestizo chapel. The spire was built inside the chapel and has awaiting the arrival of a steeple.

Mr. Brandon, born in Europe and raised in Ohio, has been the minister of the church built in Northern Ontario.

STATUE IN HONOR OF WAR HERO—Revolutionary hero of Uruguay, South America, Gen. Jose Artigas will have a 12-foot bronze likeness erected in Montevideo, Minnesota. The statue, a gift from the people of Montevideo, Uruguay, is being unloaded at Brooklyn, N.Y. It will be set up at Bemidji which will be held this summer in Minnesota.—S.N.S. photo.

Electric Power From Windmill

A contract for the design and construction in the Orkneys of an experimental windmill to generate electricity, the first of its kind in Britain, has been placed with the North of Scotland Hydro Electric Board with John Brown and Co. The diameter across the blades will be about 60 feet and it will generate about 100. The board is co-operating with the electrical research association which, at the request of the government, is investigating the practicality of generating electricity on a large scale from the wind. The association began its preliminary work in the Orkneys in July of last year, and work will speed on the expected northward shift of the Maitland and the design of the windmill can now be put in hand.

CANADIAN CURLING TEAM TO VISIT SCOTLAND NEXT YEAR

Secretaries of all curling clubs in Alberta recently received letters from the Alberta Branch of the Royal Caledonian Curling Club setting forth the arrangements being made for the proposed trip of Canadian teams to Scotland early in 1950, and below is a brief summary of these regulations:

The number invited is 50 curlers. Travel arrangements to and from point of embarkation to point of disembarkation at from \$1200 to \$1500 per man. This does not cover any other travel costs from home to point of sailing.

The prospective time of departure for Scotland will be immediately after Christmas 1949 or early in January 1950. The length of stay in Scotland is approximately one month.

Eight players will go from Alberta, four from the north and four from the south.

Local clubs can nominate one of their members for a place on the team, and names of nominees should be in the hands of the secretary not later than August 1, 1949.

NEW FODDER PLANT

According to reports from Soviet sources a perennial plant of parsnip, beet, hemp and colza resistance has been developed for crossing Johnson grass with sorghum. It is reported that 50 thousand acres will be sown as the first large scale planting and this acreage will be increased to 250 thousand by 1950.

Cost of the tour is estimated from point of embarkation to point of disembarkation at from \$1200 to \$1500 per man. This does not cover any other travel costs from home to point of sailing.

Upon selection of the team early in September \$500 will be required to be paid at once and the balance as required to cover all available accommodation is selected.

If any local curler, a member of an affiliated club, wants to be nominated to make the tour to Scotland he should notify the secretary of his club before August 1st.

Big Game Bag Limits Reduced For 1949

Reduction in the bag limits from six animals to three is prescribed in Alberta's big game regulations for 1949, released today by Hon. N. E. Tanner, Minister of Lands and Forests. Instead of a moose, an elk and a deer all in one day, only one of these animals may be taken during the 1949 season. Last year hunters were allowed both a sheep and a goat, but the new regulations only allow one of either of these animals.

Diminishing supplies of big game have necessitated the step. The season for sheep and goat opens September 15th and runs to October 15th, then until the rutting season for deer, moose and elk extends from November 1st to November 30th. For grizzly bear, black bear or cinnamon bear, the season will be open September first from September 15th to November 30th and again from April 1st to 4th of next year.

Concerning the wolf, rules of the big game regulations, Mr. Tanner announced that on and after May 4th, 1949 for royalties on all coyotes, badgers and skunks killed in the prairie and coastal areas. Minister stated that this step was taken to encourage hunters in these campaigns against these predatory animals. Prior to cancellation royalties amount of 15¢ for badger, 10¢ for skunk, 25¢ for coyotes were collected.

In the seasons outlined above, both residents and non-residents will be allowed to take three animals under a big game license. One of these may be either a male sheep or a male or female goat. Another may be either a male deer, a male moose or a male elk. The third may be either a grizzly bear, or a black, cinnamon or brown bear. In the case of any kind of a bear, female with cubs are protected.

Special licenses may be issued to both residents and non-residents taking that quantity of one deer elk or moose from September 15th to October 15th in that portion of the Athabasca Forest Reserve lying to the south of the provincial boundary to its junction with the Smoky River, thence following the Smoky River to where it intersects the north boundary of the Forest Reserve.

The various license fees and royalties are set in the regulations as follows:

Non-resident

Licence to take up to three big game animals	100.00
Special license	5.00
Royalty for each grizzly bear	50.00
Royalty for each black, brown or cinnamon bear	10.00

Resident

Licence to take up to three big game animals	5.00
Special license	5.00
Royalty for each grizzly bear	2.50

Outfitters and Guides

Licence fees have been changed as follows:

Class E non-resident outfitter's license	75.00
Class A resident outfitter's license	25.00
Class B outfitter's license	15.00
Class C outfitter's license	10.00
Class D outfitter's license	5.00

Guide's license A or B class	2.50
Guide's license class C	1.00

MORE THAN 3,700,000 MEDALS BEING MINTED

The amount of work that has gone into the minting of medals, campaign stars, clasps, oak leaves, etc., is eagerly awaited Service decorations of hundreds of thousands of Canadian men and women, is revealed in figures released this week at Ottawa.

As almost everyone who enlisted for "active service" is entitled to the "War Medal", some 1,060,000 of these have been minted since this date. This is followed by the Canadian Volunteer Service Medal of which 900,000 medals and 524,000 clasps, denoting service outside Canada, are being struck.

Other decorations include the number issued under the Mint Act are: 1939: 280,000; Atlantic Star: 5,200; Italy Star, 102,500; France-Germany Star, 250,000; Defence Medal, 460,000 and the Air Europe Star, 12,000.

AIR CAR-FERRY

Silver Airways Ltd., an associate of British European Airways Corporation, has now put into a schedule of services operating four times a day each way across the English Channel between Lympne in Kent and Le Touquet, France. The fare for a single journey will be \$15 for cars to 12 passengers, including four passengers and luggage. The service is run with Bristol Freightair Aircraft and started operating on April 14.

seats will be required during 1949 as in last season. This regulation applies to both resident and non-residents of Alberta.

in strictest confidence...

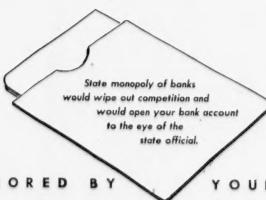

THAT'S THE WAY you want your money handled. That's the way your bank handles them.

When you deposit money, cash a cheque, make a money transfer, arrange a loan, you want it done speedily, efficiently . . . and above all, confidentially.

It is only natural that your bank should work that way for you, for privacy is traditional in Canadian banking. In any case, the competition of other banks assures it.

Canada's ten chartered banks — competitive, efficient, private — provide for millions of customers a service unexcelled in the world.

State monopoly of banks would wipe out competition and would open your bank account to the eye of the state official.

SPONSORED BY YOUR BANK

There's a big investment behind the gas for every car

Finding oil and bringing it to you—in the kind of products you need, and at low prices—is a big job and takes a lot of money. Behind that dependable supply are thousands of Canadians engaged in finding, producing, transporting, refining and marketing—working with tools that cost hundreds of millions. But the investment in those tools is your guarantee of adequate supply and minimum price.

FIRST, crude oil must be transported to a refinery. Tank cars, pipe lines and ocean and lake tankers are the vehicles. A large pipe line may cost \$100,000 a mile. Imperial's largest tankers, just put into service, cost more than \$5 millions.

SECOND, the crude oil must be refined into hundreds of useful products. Large and complex refining units are the workman's equipment here. To meet your increasing needs for more and better products Imperial since the war has added refining capacity to process an extra 31,000 barrels per day. The cost was more than \$30 millions.

FOURTH, the products must be marketed—this means they must be made available to you when and where you need them. The tools of the marketer are such things as service stations, truck fleets, coastal ships, barges, oil drums and tanks. That equipment, too, adds up to millions.

Canadians are using twice as much oil as in 1939. To help meet your increasing needs Imperial has sought and found new fields, built ships and pipe lines, erected new refinery units, installed new marketing equipment. It costs more than twice as much to do these things as before the war.

The money we needed to do these things came from borrowing, from the sale of investments and from earnings put back into the business after paying dividends.

This money is helping to provide the tools to bring you all the oil you need—at the lowest possible price.

Bringing you oil is a big job—and a costly one.

IMPERIAL OIL LIMITED

If you're interested in facts . . .

The price of a gallon of gasoline today is about the same as the price of a gallon of distilled water.

For years before the war the wholesale price of gasoline dropped almost steadily and although it has been caught in the general upward of costs it has not increased nearly as much as other commodities.

Since 1939 the general wholesale price index has more than doubled but the petroleum products price index has advanced by less than two-thirds.

On its 1948 operations Imperial earned a profit equivalent to less than one cent a gallon for each gallon of products sold.

Irrigation Projects In Alberta Are Proving Practical And Profitable

THE earliest record of irrigation in Alberta dates back to 1879 when a small ditch was built south of the present city of Calgary. For the first 20 years irrigation works were built by ranchers, mainly for the irrigation of their meadows. With the passing of the Northwest Irrigation Act by parliament in 1894, the benefits to be derived from irrigation in the Prairie provinces were brought to the attention of the public throughout Canada.

The passing of this Act marked areas formerly subjected to devastating droughts.

Comunities of prosperous farmers now live in the enjoyment of greater social and educational advantages than those of the early days of independence. But these irrigation areas cover only a small part of this state, the dry climate which is naturally fertile, irrigation farms are located at Taber and Raymond, where sugar beet crops are grown successfully. The first irrigation project in Canada was located at Brooks, Newfoundland, where sugar beets are raised. Irrigation projects are where wheat and vegetable farming is extensively grown by irrigation. The projects now operating in Alberta are the result of the conversion of the dry land in Southern Alberta to both practical and profitable agriculture. Irrigation projects are in progress and planned.

SELECTED RECIPES

RECIPES

BASIC RECIPE FOR WHITE BREAD

Quick Method

2 cups lukewarm or potato water or half and half
4 teaspoons salt
1 tablespoon sugar
2 tablespoons shortening
2 cakes compressed yeast
1/2 cup milk
6 to 7 cups sifted bread flour

Soften yeast in lukewarm water. Dissolve sugar in milk. Mix in a large mixing bowl, cool and when lukewarm add softened yeast and shortening.

Gradually stir in remaining flour, adding just enough to make dough that it will not stick to the fingers. Turn out, dust with flour, and knead until smooth and elastic, adding flour as needed.

Place dough in greased bowl and brush with melted shortening, cover and let rise in a warm place until double in bulk (1 to 1 1/2 hours). Turn out, shape into loaves, and let rise 1/2 hour.

Bake in hot oven (375 deg. F.) for 20 minutes; then reduce heat to (350 deg. F.) and bake 40 to 50 minutes longer.

Makes 2 loaves.

Variations:

Graham or Whole Wheat or Rye: Substitute one-third whole wheat and two-thirds rye flour for all the flour desired. Blend the two flours together well before starting to make your dough. Yeast may be added to the batter if desired.

Raisin or Fruit Bread: Add 1 to 1 1/2 cups mixed fruit or raisins, folding in the fruit when half the flour has been added.

\$10,000,000 Worth Of Lumber To Be Purchased

VANCOUVER—More than 100,000,000 worth of lumber will be purchased in the Pacific Northwest by the United Kingdom in the near future.

Procurement of 130,000,000 board feet of lumber has been authorized by the Economic Co-operation Administration, which it was announced by Mr. N. W. Newhouse, chief of the lumber branch of E.C.A.

E.C.A.'s share of the total will depend upon her ability to meet Washington's demand for lumber, which was indicated by Mr. Newhouse. His aids would be occupied soon and the lumber will be transported immediately.

VANCOUVER—McNeely Company, division of the Aluminum Company of Canada, has in an interview a large steel plant and other new industries may follow establishment of the aluminum plant, the west coast's first.

The official said his company is prepared to go ahead with plans for the huge aluminum plant if present market conditions warrant it.

"If and when we start the plant," he said, "we hope to see a steel industry develop here also, a pulp and paper plant, and a company for making fertilizers."

He estimated the first large components of a tonnate and other developments will cost more than \$500,000,000. The townsite would support a population of 50,000, he said.

A new 70-ton luxury airliner has been test-flown at a speed of 498 miles an hour.

American Boy-Mayor Visits Unesco

Touring Europe to study the problems of displaced children. John Flinney, 16-year-old boy mayor of a town's 1,000 residents at Dobb's Ferry, New York, is shown here in Paris with John Tamm, Canadian Representative to the United Nations Educational, Scientific and Cultural Organization (Unesco). Unesco itself as part of its educational reconstruction job, has taken steps to promote closer contact between the various towns and villages set up for handicapped children throughout the world.

Red Tape Tales

According to the Associated Press despatch from London an Englishman can now use his dirty bath water to wash his automobile. This ruling, made by the County coroner, means that a London motorist a fine of roughly \$1.50 after he was hauled into court on a Metropolitan Board charge that he had used water from his dirty bathtub as drinking water. The Board had issued an order that the owner was a commercial user of water. The undersigned just in charge of the drinking water, but the court itself proves that the Englishman of today has to step warily through

life to avoid the skein of bureaucratic red tape that threatens to snare him monetarily as he tangles down the straight and narrow path of regimentation.

But, ringed by socialistic rules without end, the modern Englishman has not lost his desire for the "romantic" profit motive, nor has he lost that spirit of adventure that made him the greatest commercial explorer in history. They're now exploring over the story of London's most famous street, the Strand tobacco shop and purchased 300 cans of lighter fluid at a fantastic price. The store owner was mystified as he handled the unusual order.

"It's this way," confided the purchaser. "I put the fluid in the petrol tank of my car and drive out to the country to buy eggs. I'll admit my profit this way is expensive but I make an enormous profit on my eggs."

GIVE GENEROUSLY TO THE SALVATION ARMY

"We Liberals have dedicated ourselves to maintaining a high level of employment and income. This means a high and widely distributed standard of living for our people."

Prime Minister Louis St. Laurent

More Jobs—More Income

More people are working than in the previous pre-peace period — nearly a million more than in 1939. More jobs are as high as in 1939, as high as in 1939, as high as in 1939, as high as in 1939.

More Savings

People have nearly 25 million more bank accounts than before the war. They have put aside more than 4 billion dollars in personal bank savings.

More Production and Trade

The products of our farms and forests, factories and mines and fisheries are worth twice as much as ten years ago. And Canada is greater. Canada is the world's third largest trading nation.

More Family Allowances

The federal government has had twice income tax since 1945. The new pension basis is now increased to \$40.00 a month, providing greater comfort and security for the aged and blind.

More Old Age Pensions

Federal payments have been twice increased since 1945. The new pension basis is now increased to \$40.00 a month, providing greater comfort and security for the aged and blind.

Aid to Home Builders

Close to 300,000 dwellings have been built since the war.

More houses have been built in proportion to population, than in any other country, and more were built last year than any time in our history.

And lowered taxes
as well!

By careful administration the federal government has established these records and been able at the same time to cut the national debt by 1,625 million dollars. And every budget since 1945 has announced lowered rates of taxation.

brought about by
constructive Liberal policies

Liberals mean what they say. Look over the record of the last five years — the most impressive period of prosperity and growth in our history. It shows that Liberal performance exceeds Liberal promises.

Under Liberal policies, Canadians can be confident that this forward march will continue — that Liberal promises will again be carried out.
